

Solutions for Behavioral Healthcare

GUARD1

At GUARD1, our business is managing and documenting proof of presence. Whether it's knowing your staff have completed checks or provided services, that's what we do. Here are some of the many ways a GUARD1 Real Time system can help your operations and give you – and your staff – peace of mind.

Scanning a RFID room tag.

Document activities such as visits and sessions.

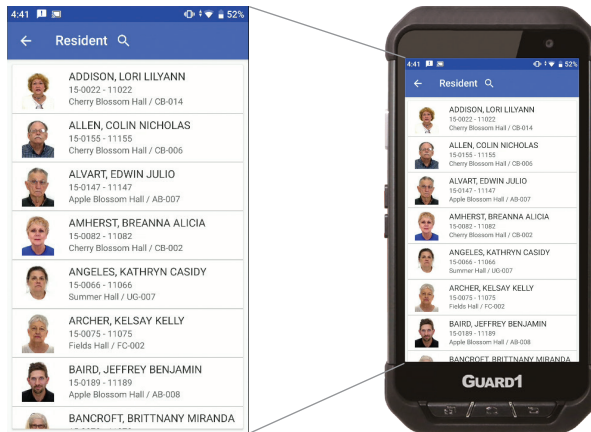

Improve Your Well-being Checks

The checks you make on patients or residents are required by standards of care or by legal mandate. Even one missed check could result in harm to an individual in your care. Missed checks are a risk to your organization and your reputation.

GUARD1 provides solutions for managing your checks. Your staff can record checks with mobile devices or with our simple and reliable PIPE data recorder.

Document Patient Services

GUARD1 does much more than just well-being checks. It can track services you provide, such as visits with family, sessions with providers, or out of room activities. It can track handouts like books or toiletries. Documenting anything takes just a few clicks.

Rules, Alerts and Notifications

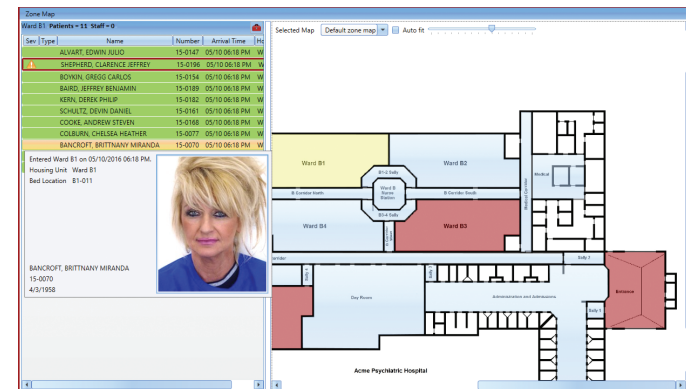

GUARD1 uses rules you set to determine when checks are due. When a check or any other task is late, it will raise an alert.

For any alert, GUARD1 can send a message – via text or e-mail – to notify your staff. That means a supervisor can help a staff member who needs help, or follow up on service or checks that were missed.

Replace Paper Records

If your facilities are still using paper to document checks on patients or residents, you know the extra work it is creating. Maybe you have tried a system to manage your checks and tasks but found it wanting.

GUARD1 manages all that information for you. A test by Betagov, an independent organization, found GUARD1 to be 100% accurate – compared to less than 60% accuracy with paper records.

View alerts with a map of your facility and individual details.

GUARD1 Features

- Eliminates manual recordkeeping
- Documents any individual's activities
- Complete history for any individual – checks, activities, locations
- Robust reporting for compliance
- Business Intelligence
- Optional tracking of individuals and personal alarms for staff

Empower Your Staff

Your team is busy. With GUARD1 to manage your staff's busy task list, your team can focus instead on the individuals in their care.

Give your staff the tool that:

- keeps track of upcoming tasks
- reminds them when tasks are due
- documents everything, simply and easily, and
- is 100% accurate.

GUARD1 gives your team the tools they need to keep track of tasks and easily keep electronic documentation.

Manage Your Facility

GUARD1 gives you real time information about the individuals in your facility. Print a history of checks, or services provided to a single individual. Or generate compliance reports on demand.

Pause Resume

View complete history for any individual.

GUARD1 can warn your staff of an elopement event.

Prevent Elopement

GUARD1 active beacon tags – wristbands or ID badges – offer real time tracking of people and things. By placing a tracking receiver in a warning zone – for example, just outside an exit – your GUARD1 system can detect individuals who have entered the zone and signal an alert. The notification system in GUARD1 Real Time can send a message – via text or e-mail – to your staff, or sound an alert in a control area.

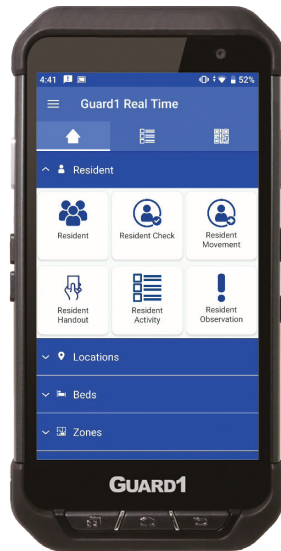

Protect your staff with the GUARD1 Duress Device.

Protect Your Staff

GUARD1 includes real time personal alarms with zone location. Staff wear or carry a GUARD1 Duress Device. To summon help, simply press the button.

A Flexible System to Meet Your Needs

For facilities with just a few beds, to large organizations with multiple facilities, GUARD1 offers a solution that is complete, scalable and upgradeable.

GUARD1 mobile device.

The PIPE, our super-rugged data collector.

GUARD1 RFID wristband.

Devices for Staff

GUARD1 SuperMAX mobile devices give you capability and flexibility. Document checks, services, inspections, handouts, and more. Scan wristbands or ID cards to identify an individual, select the action – checks, services – and your documentation is complete.

Your staff can also record checks with The PIPE, our rugged reader proven in thousands of facilities.

Wristbands or ID Cards

GUARD1 gives you a choice of customizable, LaserPrint wristbands or ID cards for identifying individuals. If providing tags is not an option, GUARD1 uses a bed or room tag to identify an individual and perform checks or document observations or activities.

Real Time Software

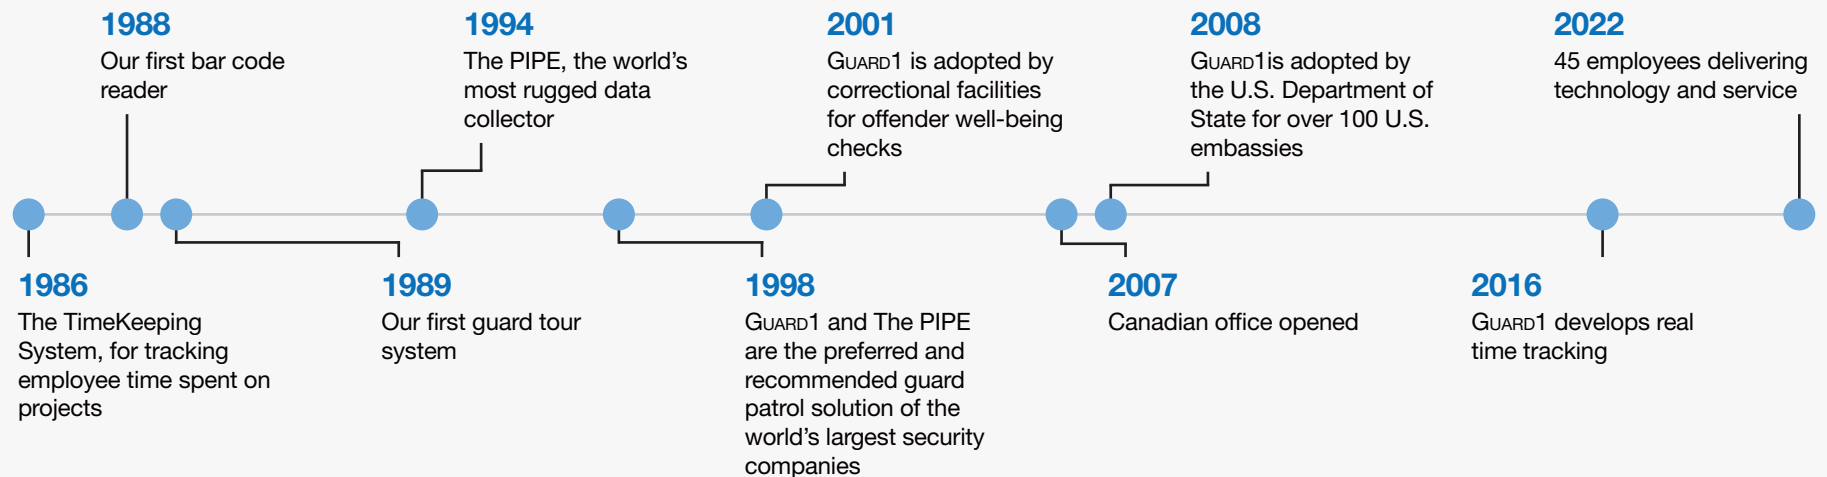

GUARD1 Real Time software gives you:

- On-premises or hosted
- Task lists for staff
- Rule based checks
- Alerts for late or missed tasks
- Notifications for supervisors
- Business intelligence
- High availability
- Scalable and expandable
- Integration with external systems
- ... and much more.
